

What We Do

At Latched Beginnings, we specialize in compassionate, effective care for infants facing oral ties and feeding challenges. Led by Dr. Kacie Culotta, we provide advanced tongue-tie releases and holistic support to help your baby eat, grow, and thrive.

CO2 Laser Tongue-Tie Releases

Gentle, precise procedures for improved feeding and comfort.

In-Person Consultations

Comprehensive evaluations to identify oral ties and create tailored care plans.

Post-Op Care

Detailed guidance and support to ensure smooth recovery and lasting results.

I'm A Mom Too...

I'm Dr. Kacie Culotta—a dentist, lactation counselor, and mom with a heart for helping families thrive. My passion for supporting moms and their babies began with my own little ones. My mission is to help your little one grow, feed, and breathe with ease, so you can enjoy the peace of mind and joy that come with a healthy, thriving start.

Helping Your Baby Thrive

Expert Tongue-Tie and Feeding
Support for Infants

WHAT IS A LIP TIE?

A lip tie is a tight frenulum between the upper lip and gums, preventing a baby from flanging their lip properly over the breast or bottle nipple. This can cause maternal pain and lead to the baby swallowing excess air, resulting in gassiness and fussiness.

WHAT IS A TONGUE TIE?

A tongue tie occurs when the fascia under the tongue restricts its movement, leading to poor latch, nipple injuries, difficulty transferring milk, and issues like poor weight gain or low milk supply.

Why Latched?

Led by Dr. Kacie Culotta, a laser-certified dentist and lactation counselor, Latched Beginnings combines advanced technology with a personal touch. Our LightScalpel CO2 laser ensures precise, minimally invasive procedures, while our all-mom team provides the understanding and support you need during this delicate time

- Individualized care plans tailored to your baby's needs
- Holistic support to address feeding, body tension, and wellness
- A compassionate, collaborative approach to infant care

Know When To Seek Help

Up to 12% of babies are born with a tongue tie affecting their ability to take in milk and impacting their overall health and wellness. Here are some common symptoms in both infants and parents:
